QUANTUM QT-48 & QT-58
INSTRUCTIONS

The QT-48 and QT-58 are dual output connectors designed for operating two flashes simultaneously.

QT-48 - for use with the Quantum Turbo Battery.
QT-58 - for use with the Quantum Turbo 500 Battery.

WARNING: Turn the Turbo Battery off before connecting or disconnecting any cables or flash units.

1. Connect a separate Turbo Cable of the correct type to each flash.
2. Connect the Turbo Cables from each flash to the sockets of the dual output connector.
3. Plug the dual output connector into the Turbo Battery.

Note: The dual output connector will not operate unless two Turbo Cables are being used. If you desire to power just one flash, disconnect the dual output connector from the system and plug the flash and Turbo Cable directly into the Turbo battery.
