

QUANTUM AMERICAN STYLE BRACKET QF71

with adjustable handle

INSTRUCTIONS

The handle of the QF71 bracket adjusts to 3 positions.

To adjust the handle position, loosen screws "A" and "B" as shown. Line up screw "A" with hole 1,2, or 3, (see recommended handle positions below). Tighten screws "A" and "B".

Recommended handle positions:

For 35mm and medium format cameras with an AE prism finder, use hole 1.

For medium format cameras with a waist level finder, use hole 3.
