

## QUANTUM POWER MODULE N INSTRUCTIONS

---

Power Module N was designed for use with the Nissin 4000 GW, 4800 GT and the RICOH SL-400 flash system.

For proper orientation of the power module, line up the positive (+) side of the power module, (the post nearest the red slide button) with the diagram inside the battery compartment, showing the positive (+) side of the battery facing downward. (See diagram.)

Squeeze the slide buttons together when inserting or removing the power module, release to lock into place.

See the Quantum Battery 2 Operating Manual for further instructions.
